

Highlight lean Six Sigma Implementation in Higher Education

Dr. Ahmed M. Abed

Industrial department

Lean six sigma is a methodology that has wide implementation in different fields.

One of such fields is the education (teaching process) in order to achieve a quality and increase the performance to reach the higher satisfaction case for all stakeholders , of either students or job-market. Any organization respecting the declared methodology gets its objectives and makes an economic renaissance via export people with good education reputation , hose supply their countries with a foreign country. The education is an elegant industry because it makes a higher sophisticates formulation for high sensitive part , which is taken in mind.

Therefore, education process must be constrained with obvious methodology has good reputation to wait good output specification. This presentation aims to highlight a lean six sigma implementation in education as a purpose for top management level.
